

# BALTIMORE GAS AND ELECTRIC

---

## *Environmental Policy*

BGE believes proper care of the environment is essential to the well being of our company, its employees, and its neighbors. We are committed to protecting the environment and responsibly managing natural resources.

### OUR PRINCIPLES

#### INTEGRITY

We are committed to conducting our business in compliance with the letter and spirit of the law. Where appropriate, we establish our own policies and standards that meet or exceed legal requirements. We work with suppliers, contractors, and other partners to meet environmental requirements.

#### PERFORMANCE

We work to continuously improve the way we manage our environmental responsibilities. We measure, audit, and take corrective action to sustain or improve our environmental performance.

#### ACCOUNTABILITY

Environmental concerns are an integral part of our business. We support all our employees in handling the environmental responsibilities of their work and encourage their environmental awareness both on and off the job.

#### STEWARDSHIP

We make pollution prevention, environmental protection, and resource conservation important considerations in locating, designing, building, and operating our facilities. We promote the efficient use of natural resources and support community efforts that encourage environmental awareness and improvements.

#### COMMUNICATIONS

We communicate with and respond to our customers, neighbors, employees, regulators, and others about the environmental aspects of our business.

Kenneth W. DeFontes, Jr.  
President, BGE
