

# “I PUT IN WAY TOO MUCH OVERTIME.”

— OVERHEAD LIGHT

## Learn to speak the language of energy efficiency. Save 50% to 80% on upgrades.

Lighting consumes up to 30% of the energy in your office building. You can save on energy costs and consumption by converting older lighting fixtures to new, energy-efficient options. BGE's Small Business Lighting Solutions Program provides a custom energy analysis, easy-to-follow recommendations, and financial incentives that cover up to 80% of the total lighting upgrade costs for small businesses. And all businesses can take advantage of BGE's Energy Solutions for Business Program, which offers technical assistance and financial incentives that cover up to 50% of the total costs of most energy efficiency upgrades. **Visit [BGESmartEnergy.com](http://BGESmartEnergy.com) or call 877.685.SESP (7377)** to learn how energy efficiency is a wise business investment.

Reduce wattage in light fixtures with energy-efficient lamps and ballasts.

Consider installing motion-sensitive switches in offices, break-rooms and other common areas.

Replace exit signs with energy-efficient LED models.

**We're on it.**<sup>SM</sup>
