

Energy Efficiency

The BGE Smart Energy Savers Program® helps business customers increase energy efficiency and savings. Projects that may qualify for cost saving solutions include:

- Retrofits of inefficient equipment
- New construction
- Major renovation and remodeling
- New equipment purchases
- End-of-life equipment replacements
- Recommissioning of existing equipment / building management systems
- Operations and maintenance improvements

Visit BGESMARTENERGY.COM for more information.

Design and Engineering

BGE project designers and engineers can help you during any construction that could impact your electric and natural gas needs.

Our capabilities include:

- Engineering and design of energy delivery systems to support current and future needs
- Construction services that support your energy delivery requirements
- Energy management consultation to help maximize efficiency output of your systems and equipment

Helping your business succeed to help Maryland's economy grow!

If your business is new or entering a period of expansion, we invite you to explore how we can help you succeed. This brochure outlines three instrumental ways that we can work together: the Smart Energy Economic Development (SEED) incentive, Energy Efficiency programs, and Design and Engineering project support.

Your success will strengthen Maryland's economy and help to improve everyone's quality of life. BGE can contribute to business retention and growth, which drives job creation and encourages community investment.

There are many ways that BGE can partner with you on your journey to success. If you have any questions or want more information, please contact BGE Economic Development at **ECONOMICDEVELOPMENT@BGE.COM**.

Smart Energy Economic Development (SEED)

The SEED Program offers eligible commercial customers a 25% reduction on electric and natural gas distribution and demand charges, and a 75% discount on service extension costs (for businesses that are located in a Maryland enterprise zone). Qualifying businesses must add electric and/or gas load to the system, as well as create verifiable new full-time employment.

BUSINESS LOCATION	NON-ENTERPRISE ZONE	ENTERPRISE ZONE
Minimum qualifying load	500 kW of new electric demand per month and/ or 90,000 therms of gas annually	No minimum load requirement
New full-time job requirement	At least 10 full-time jobs	At least one full-time job
BENEFITS	25 percent reduction for three years	25 percent reduction for five years
		Approved enterprise zone based businesses can also receive a 75 percent discount on service extension costs

Visit <http://commerce.maryland.gov/fund/programs-for-businesses/enterprise-zone-tax-credit> to see if your business qualifies for the enterprise zone.
