

DISCOVER YOUR FUTURE IN ENERGY!

8-week* program with hands-on experience
for students pursuing a technical trade.

Are you studying construction trades or engineer program at your school?
Would you like to make money and gain experience in your trade this summer?
If you answered yes, BGE has the summer internship program for you! BGE is looking for highly motivated high school trade students to join our summer internship program. If you are in learning more, please contact your school administrator or trade instructor today!

HIGHLIGHTS

- Earn between \$10–\$13 an hour
- Transportation provided to and from internship
- Extends the classroom experience in construction, computer-aided design, engineering and automotive technology
- Students will prepare for the industry required for the Construction and Skilled Trades (CAST) test
- Passing this test is a mandatory requirement to be eligible for entry level positions
- The BGE team will work with you, with a focus on professional development
- If you are hired on as a BGE employee, BGE offers tuition reimbursement program

REQUIREMENTS

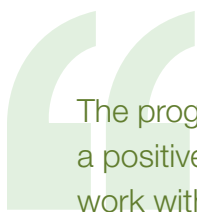

- You must be pursuing a trade related to automotive, electrical, carpentry, construction, engineering, plumbing, and computer-aided design
- You must have a strong work ethic and ready to learn about high-skill careers in trade fields
- Must be at the junior or senior level for the current academic year

**Subject to change.*

- › Green Street Academy
- › Mergenthaler (Mervo) Technical High School
- › Western School of Technology.

BGE is committed to providing opportunities to school communities within our service area. Since 2016, BGE has hosted over 170 students as a part of the BGE high school internship and has hired interns into roles within the Fleet, Substation and Maintenance, and Overhead Lines departments.

The program impacted me because after the first week or two I started to gain a positive mindset. I wanted my supervisor and anyone I had the opportunity to work with say it was a pleasure to work me. I was able to network and get to know more people, which opened up more doors and opportunities for me.”

DRE MILLS
