

An Exelon Company

## BGE Safety Watchman Process

A BGE Safety Watchman must be present when:

- ❖ Work is being performed on a transmission R.O.W.
- ❖ Equipment is being delivered on a transmission R.O.W. requiring the need of a boom truck or heavy equipment.
- ❖ When a BGE approved vendor has been granted approval to climb a transmission structure or a communications tower.

For sites currently under construction or in the planning stages, your *LightSpeed* Construction Manager will schedule a Safety Watchman as required.
