

## WE USE SMART NEW TECHNOLOGY

An Exelon Company

Innovations like smart grid are helping to make your gas and electricity more reliable. Smart new technology now helps monitor and, in many cases, automatically restores power in just moments. This new technology also helps after a storm hits by more quickly pinpointing where power still needs to be restored. More accurate and timely information allows BGE to better focus our restoration efforts and help shorten outage times. To learn more about how smart energy gets more reliable every day, visit [BGE.COM/RELIABILITY](https://www.bge.com/reliability).

**RELIABLE ENERGY. SMART ENERGY.**

## SO THE LEIGHS CAN STAY **CONNECTED.**
