save energy & earn bill credits
Receive $50–200 in bill credits, which includes a first year participation bonus. Your air conditioner will be cycled up to 50% from 1 pm – 7 pm on Energy Savings Days.

Enroll at BGESavings.com

Participate in both and you are guaranteed to receive whichever credit is greater on your summer bills.
Put your new smart meter to work for you.

Smart meters provide you access to timely and detailed information about your energy use and make it possible for you to save energy and earn summer bill credits on Energy Savings Days. You are automatically enrolled, so there is no need to sign up and you can participate regardless of your choice of energy supplier.

What are Energy Savings Days?

Energy Savings Days are typically very hot summer weekdays when the demand for electricity is expected to be particularly high. BGE generally schedules Energy Savings Days when homes and businesses are both using higher amounts of electricity, especially through air conditioning. BGE anticipates that there could be up to ten Energy Savings Days each summer.

HERE’S HOW IT WORKS:

we’ll notify you

BGE will notify you by phone, email or text between 2 p.m. – 8 p.m. the day before an Energy Savings Day. To ensure you receive these notifications, log into BGE.COM/MyAccount, verify your email address and phone number shown in the My Profile section and select your notification preferences for Smart Energy Rewards: Energy Savings Days.

reduce your use

Between 1 p.m. – 7 p.m. on an Energy Savings Day, simply use less electricity by doing things like reducing air conditioning use, delaying the use of large appliances or turning off lights. For more energy savings tips, visit BGE.COM/EnergySavingsDayTips.

earn rewards

Within a few days, we’ll notify you by phone, email or text to let you know how much you saved. You’ll earn bill credits of $1.25 for every kilowatt-hour saved compared to your typical usage on days with similar weather.

How much can I save?

BGE will calculate your savings by comparing your electricity usage during an Energy Savings Day with your usage on days with similar weather leading up to it. You earn $1.25 for every kilowatt-hour of electricity you reduce on an Energy Savings Day, compared with what you normally use. Based on results from summers 2014-2015, participating customers saved an average of $5–8*** per Energy Savings Day.

***Your actual savings will vary. Customers should exercise discretion and consider health impacts when reducing electricity usage.

Sign up for alerts and stay informed!

BGE will notify you by phone, email or text the day before an Energy Savings Day. To ensure you receive these notifications, make sure your contact information is up to date through your BGE online account.

Sign up to receive text alerts directly to your mobile phone. Text messages are a great way to receive immediate notification in advance of an Energy Savings Day.

To sign up for text alerts:

1. Log into BGE.COM/MyAccount
2. Provide your cell phone number under the My Profile tab and

You can cancel your alert subscriptions at any time.

*Terms and message rates may apply.

PeakRewards - Air Conditioning (A/C) Program

The PeakRewards A/C program is designed to help ease the peak demand for electricity in the Mid-Atlantic region. By enrolling in the program, you allow BGE to cycle your air conditioner on and off during periods of summer peak demand in exchange for bill credits. As a reward for participation, you’ll receive bill credits of $50 – $200*** June through September. If there is a significant increase in summer peak energy demand, your PeakRewards device (either a professionally-installed thermostat or outdoor switch) will receive a signal to cycle your air conditioner.

Choose a cycling level that’s right for you.

Choose a cycling level that best fits your lifestyle—50%, 75% or 100%.

At 50%, you receive $50 in summer bill credits ($12.50 per month June-September). During emergency cycling events, your A/C will produce cool air for only half of the time it would normally run.

At 75%, you receive $75 in summer bill credits ($18.75 per month June-September). During emergency cycling events, your A/C will produce cool air for only 25% of the time it would normally run.

At 100%, you receive $100 in summer bill credits ($25 per month June-September). During emergency cycling events, your A/C will be off and will not produce cool air for the duration of the event, even if it lasts multiple hours.

To sign up, visit BGE.Savings.com.

*Your actual savings will vary. Customers should exercise discretion and consider health impacts when reducing electricity usage.

**This includes first-year bonus credits. A customer moving into a home with an existing PeakRewards device is not eligible to receive the first-year bonus credits since the bonus is intended for the initial enrolment and installation of a device at a customer’s home.

Energy Savings Days and PeakRewards

During Energy Savings Days, your PeakRewards device will only be cycled up to 50%, regardless of your chosen cycling level. You have unlimited cycling overrides on Energy Savings Days. However, as in the past, during emergency cycling events, you will be cycled up to your chosen participation level (50%, 75% or 100%) and overrides are not permitted.

Why is BGE offering these programs?

BGE is offering these programs to encourage customers to use less energy during summer peak hours. Managing summer peak demand helps to reduce the need for additional power plants, helps to keep down the overall cost of electricity and eases the burden on Maryland’s electricity delivery system as our state’s population continues to grow.

La versión en español de esta guía está disponible en línea en BGE.COM/EnergySavingsDay/Spanish.

These programs support the EmPOWER Maryland Energy Efficiency Act.
